

RMD Weather Report

21 January 2025

SOUTHERN AFRICA

[Windy](#) 12-Day Precipitation Forecast. (24-hour time slot)

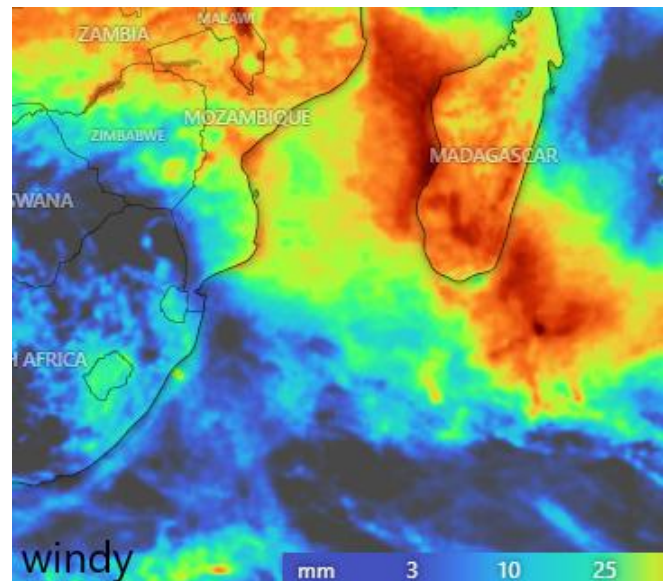

DRYER CONDITIONS AHEAD

Mostly isolated rain events are in store the next week in the interior.

Tropical moisture will elude the producing areas the next week due to a low-pressure system situated in the Mozambique channel, note the image on the right.

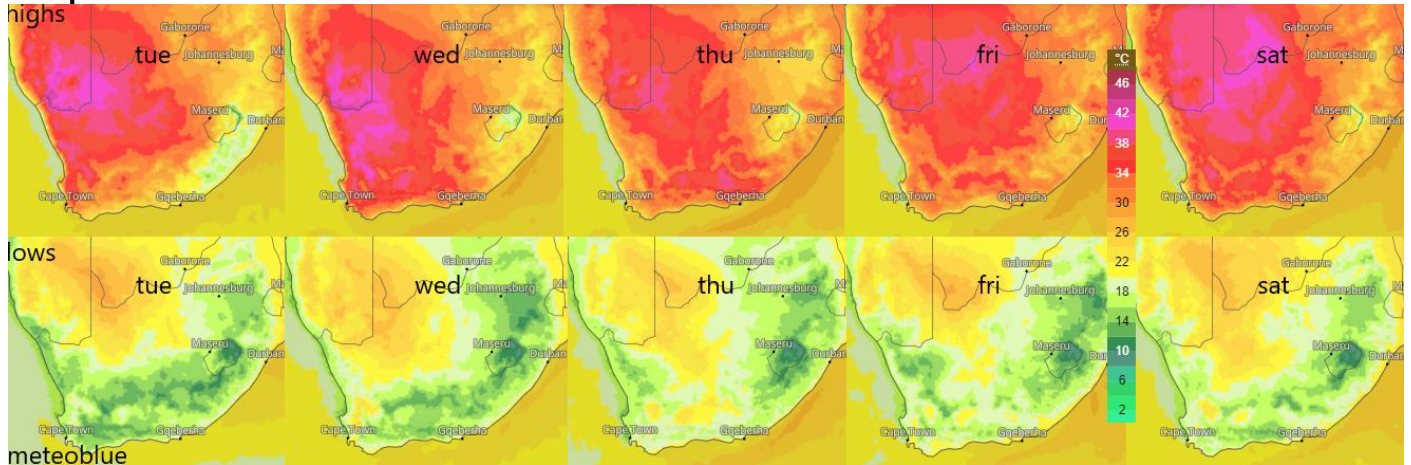

This event is not expected to turn into a high-risk cyclone at this stage.

From next week Monday, tropical moisture is expected to start moving into the interior with limited rain in store at this stage.

Channel activities the next week.

Temperatures

[Meteoblue](#). Highs and Lows 5-Day Temperature Forecast
